5. LEARNING AND TEACHING STRATEGY
--

Learning and teaching methods:

Students will be provided with opportunities to engage in a diverse range of learning environments to maximise their learning. For this programme, students will interact with their tutor during face-to-face sessions as well as through the e-platform.

The face-to-face sessions are an opportunity to untangle complex concepts and provide students with an opportunity to apply the knowledge acquired in the preceding weeks. During the face-to-face sessions, students can be expected to:

- Engage in problem-solving activities
- Engage with reading material to engage in class discussions
- Review core/complex concepts through applied work.

The e- platform will use the following tools:

- Independent study: Independent study forms an essential part of the development of your knowledge and understanding. We will guide you, via the e-platform, on the reading and

reflection of primary and secondary texts. Students should use this independent study time to link knowledge with e-class and face-to-face activities and develop their understanding and critical perspective on the topics they are studying.

Overall Workload:

Your overall workload as a student consists of independent learning, e-learning activities and, if you choose to, face to face sessions. The following gives you an indication of how much time you will need to spend on the different components of your programme at each level. Each ECTS credit taken equates to 25 hours of study time.

The expected study time for this programme will be as follow:

Year 1: 1,500 hours for 60 ECTS credits.

Year 2: 1,500 hours for 60 ECTS credits.

Year 3: 1,500 hours for 60 ECTS credits.

Typically, for each year of your degree, you will spend 0-10% of your time in face to face sessions, 30-40% of your time engaging with e-learning activities and 60% of your time in independent study time.

A typical study week for a student will involve some optional face to face sessions, required engagement in an online discussion forum, the completion of online activities and independent study time to review attached readings, textbooks and relevant sections of the module documentation. Students should expect to devote 8 to 12 hours of study time per week per module.

These are indicative and may vary from student to student.

6. ASSESSMENT STRATEGY

Assessment Methods

A range of formative and summative assessment exercises are designed to enable you to demonstrate and apply your knowledge and understanding. Excluding the law clinic and the dissertation, modules will consist of Tutor Marked Assessment components and/or an examination.

TMA's include:

Feedback on assessment will be provided along with the marking criteria. Marking criteria will be made available to the student at the same time as the coursework/assessment details.

Students will receive written individual feedback on all TMA components.

9. GRADING

Grading system:

Assessments are graded in percentage and correspond to a letter grade and a grade point.

Marks (x) %	Description	Letter Grade	Grade point
$X \geq 70$	Excellent	A	5
$60 \leq X < 70$	Very Good	B	4
$50 \leq X < 60$	Good	C	3
$40 \leq X < 50$	Satisfactory	D	2
$X < 40$	Ungraded	U	0
Non-graded/pending	See section 17.1.1 in assessment rules and regulation for pending grades letter codes		

To pass a module, students need an overall of 40% weighted average of their combined continuous assessment and examination. All components of TMAs will have to be submitted and examination set to pass the module.

Students will normally not be allowed to postpone more than two modules for the following semester.

If a student obtains grade "U" in three or more modules in the same semester, and the CPA is below 40 for that semester, the student will be requested to repeat the semester unless decided otherwise by the Academic Council upon the recommendation of the Board of Examiners. When repeating a semester, a student may or may not take the modules for which Grade C or above has been obtained.

If after completing a level the student's CPA < 40, the student will have to repeat the entire academic year and retake the modules as and when offered. However, s/he will not be required, if s/he wishes, to retake 3 module(s) for which Grade C or above has been obtained.

Students will not be allowed to repeat more than two semesters during the entire duration of the programme.

University general marking criteria for undergraduate exams and undergraduate dissertations can be found in the General Rules.

Cumulative Point Average (CPA)

Total CPA for undergraduate degrees is calculated by multiplying the module credit by the % marks for the module and then summed up and divided by the total credits attempted over the cumulative period.

10. PROGRESSION, EXIT POINTS AND AWARD
